

STRESS-FREE PRINTER OPERATION

Intuitive Printer Display Solution

For CT4-LX, CT4-LX-HC

Intuitive Printer Display Solution

NECESSARY INFO AT A GLANCE

Streamline and enhance printer operations by configuring the printer to display only the information that is relevant to the clinical staff, such as tutorial videos, helpdesk information and essential settings.

BETTER UI WITH SHORTCUT BUTTONS

Shortcut buttons at the bottom of the screen enable quick access to frequently used functions, helpdesk information and tutorial videos for troubleshooting. The user-friendly display enhances intuitive operation and prevents unintended tampering of settings.

EASILY CUSTOMISABLE

Hospital IT staff or their business partner can easily customise the screen to their preferences without additional programming.

COMMON CHALLENGES:

- 1 Tedious printer operations take clinical staff's time away from patient care.
- 2 Clinical staff may unintentionally modify printer settings, causing errors that must be fixed by the IT department.
- 3 Managing the printer fleet, as well as its settings, is a hassle for the IT department.

ENHANCE LABELLING PRODUCTIVITY AND ACCURACY WHILE REDUCING COSTS

SATO AEP (Application Enabled Printing) allows for tailor-made labelling applications for purposes such as PC-less printing and direct connection of peripherals such as keyboards, scanners and scales.

Displays in
31
languages

- 1 No need to physically label printer info. Asset data is managed centrally together with settings.
- 2 Shortcut Buttons.
- 3 Helpdesk Contact.
- 4 Video Tutorials
- 5 Your logo here.
